# About B&R Enclosures

Since 1955, B&R Enclosures has built a reputation for excellence in design and production, culminating in our position as Australia's largest enclosure manufacturer and electrical equipment integration specialist.

As an independent, 100% Australian family owned and operated business, we champion the virtues of quality, innovation, service and value. The emphasis on these aspects has sustained B&R's growth leading to Australian manufacturing and distribution facilities in Brisbane, Adelaide and Sydney and internationally in China and Saudi Arabia.

B&R's knowledge, precision, quality and unwavering commitment to creating repeatable solutions for our clients supports our position as preferred manufacturer for many private, government and commercial projects in some of Australia's harshest environments.

B&R champions the virtues of quality, service and value. Combined with our unrivalled industry and application knowledge, we are in a unique position to meet the needs of our clients. The business encompasses four divisions: Industrial, Data ICT, Hazardous Areas and Residential Commercial. Each division focuses on the unique needs of different market segments.

B&R regularly works with partners to provide integrated solutions for major infrastructure and mining projects. These include 'plug and play' switchboard solutions for Rio Tinto's Oyu Tolgoi mine, control stations for Ichthys on-shore LNG processing plant and Australia's NBN Rollout. Ongoing relationships and collaboration are results of our ability to articulate the customer's problem and combine previous experience and knowledge with compliance to local standards.

Electrical integration usually involves the installation, commissioning and testing of 3rd party components and we are adept at managing the acquisition and storage of technical components through a global supply chain that is structured, customised, agile, repeatable and results-based.

Project management and execution is effectively managed at B&R by the co-location of design, supervision, supply coordination and quality control along with manufacturing. Our incorporation of Industry 4.0 delivers real-time data to our project management teams, built around the requirements of individual projects.

Extensive investment in research and development includes an environmental testing facility focussing on climate control to support cooling solutions for equipment exposed to high ambient temperatures and solar radiation.

When utilised as designed, B&R's enclosures are built to out-perform against expectations.

Contact us today to find out how B&R can deliver reliable and trusted outcomes for your project.

# Our Locations

B&R Enclosures have purpose-built manufacturing facilities in three locations across Australia, as well as strategic locations in the Gulf and China.

## Australia

### ***Brisbane (QLD)***

Global head office, manufacturing, sales and warehousing

### ***Sydney, NSW***

Hazardous manufacturing, sales and warehousing

### ***Adelaide, SA***

Manufacturing, sales and warehousing

### ***Townsville (QLD), Newcastle (NSW),***

### ***Melbourne (VIC), Perth (WA)***

Sales and warehousing

### ***Launceston (TAS), Darwin (NT)***

Distribution

## New Zealand

### ***Auckland***

Sales and warehousing

## Saudi Arabia

### ***Dammam***

Hazardous manufacturing, sales and warehousing

## China

### ***Suzhou***

Manufacturing, sales and warehousing

# Our Capabilities

Over the years as the company has grown, we have invested significantly in machinery, technology and testing to be able to provide capabilities which our customers benefit from in every order they place. Our current capabilities include:

- Purpose-built Australian facilities in Brisbane (18,000m<sup>2</sup>), Adelaide (4,000m<sup>2</sup>) and Sydney (2,500m<sup>2</sup>), providing local labour and logistics
- Complete in-house design and engineering services to assist with creating custom solutions
- End-to-end manufacturing, from coiled steel raw material to commissioning the end product, we provide efficiency and complete quality control
- Variety of substrates and high quality finishes including stainless steel, powder coated and zinc to suit even the most demanding application
- Modern machinery for any design to be formed and fabricated including automated sheet metal panel benders, punching and shearing centres, electrical equipment integration lines, press brakes, powder coat lines, fabrication cells and assembly lines
- Fully documented process available with full configuration management to support a detailed documentation experience
- Complete project management including supply chain, warehousing and logistics
- In-house and external testing for hazardous area electrical equipment and impact, IP, type testing, static load, seismic, wind load, salt spray, line inspection, shock, vibration, EMC and MIL-STD
- Continuous improvement with our environmental testing facility for ongoing research and development
- Existing supply agreements with leading OEMs and major raw products distributors supporting loyal and valued relationships climate control and cooling solutions

## Our Supply Strategies

### Made to Stock

These products are available ex stock from all our sales & warehousing branches. Contact your local sales representative to discuss requirements.

### Assembled-to-Order

These products are assembled to order upon receipt of a customer order. All components required to build an ATO item cannot be sold separately and must form part of a kit. Standard lead time is 4-6 weeks from date of order.

### Made to Order

These products are manufactured according to a customer's specification. They are marked in our catalogues as "▲ Available on request" and have a standard lead time of 2-3 weeks.

### Engineered-to-Order

These products are a custom designed product that is 100% fit-for-purpose, delivered on-site and ready for installation. Our design & engineering team can customise an enclosure to suit the application requirements. Contact us for more information.

# Customisable Project Services

## Collaboration

- Convert customer requirements to product build specifications
- Work to customer delivery schedule
- Initiate procurement or consignment of stock allocations
- Supply of equipment configuration

## Complete Project Management

- One point of contact
- Responsive communication channels
- DIFOTIS - Delivered In Full On Time In Specification
- Accountability for the delivery of our commitment to customers

## Electrical & Equipment Integration

- Wiring and equipment installed to exact requirements
- Management of free issue, consigned and/or B&R sourced components and equipment
- Stock reporting and job allocation

## Testing & Reporting To Customer Specifications

- Digital reports of product testing and acceptance
- Serialised codes to customer requirements, digital signature, component traceability and unique identifiers
- Real time quality assurance authorisation, approval and confirmation

## Customer Specific Logistics

- Storage and warehouse management
- Site delivery logistics
- Option for removal of product packaging after installation

# The B&R Engagement Loop

## (Project Services)

In order to engage successfully with our project customer's, B&R representatives follow a structured service plan.

We take our responsibility seriously, and pride ourselves on the collaborative and open relationships we undertake with our project customers. This makes sure we understand and provide value, because our customer's needs vary greatly across the different types of project applications and technical requirements.

1. Our first action before we reach out or after a customer had reached out to us, is to **INVESTIGATE**. This includes researching the customer/ project and any other relevant stakeholders.
2. The second action of **UNDERSTAND** is when we speak to the customer at length about their issue and challenges for current and future projects. From these discussions we can begin to see how our product solutions can solve the customer's issues and challenges.
3. We take our newly acquired customer knowledge back to our in-house design, engineering and estimating teams for our third action to **SCOPE** the work, and prepare quotes and drawings as required.
4. Once we have created the tailored offer for the customer we process any variations which might be needed before our fourth action of **AGREE**. With everything signed off we move into manufacturing and equipment integration.
5. Once the product solution is ready our fifth action of **DELIVER** takes place. We make sure the goods are shipped to site according to agreed upon timelines.
6. To learn from our experience and confirm our service level we take an **EVALUATION** action. This is when we reflect on the job we've completed and depending on the size and extent of the order we will seek customer feedback as well.

## Our Customers

## Accreditations & Compliance

At B&R, quality and value are just the beginning. We strive to deliver quality products developed and manufactured by a team dedicated to excellence, backed by standards, approvals and industry accreditations.

### ISO 9001:2015

Every B&R Enclosures manufacturing facility is externally audited to ensure that the quality of our products meet the stringent ISO9001 standards. B&R's products are carefully inspected at the end of lines during the manufacturing process to ensure that the enclosures will withstand their intended environment and application.

### ISO 14001:2015

Sets out the criteria for an environmental management system. It maps out a framework that a company or organisation can follow to set up an effective environmental management system.

### ISO 45001:2018

An externally audited Occupational Health and Safety Management System.

### RoHS

The RoHS directive aims to restrict certain dangerous substances commonly used in electronic and electronic equipment.

### ASSDA

The Australian Stainless Steel Development Association provides comprehensive technical information on stainless steel. This includes information for users, equipment manufacturers and stainless steel suppliers.

# Infinity 3G

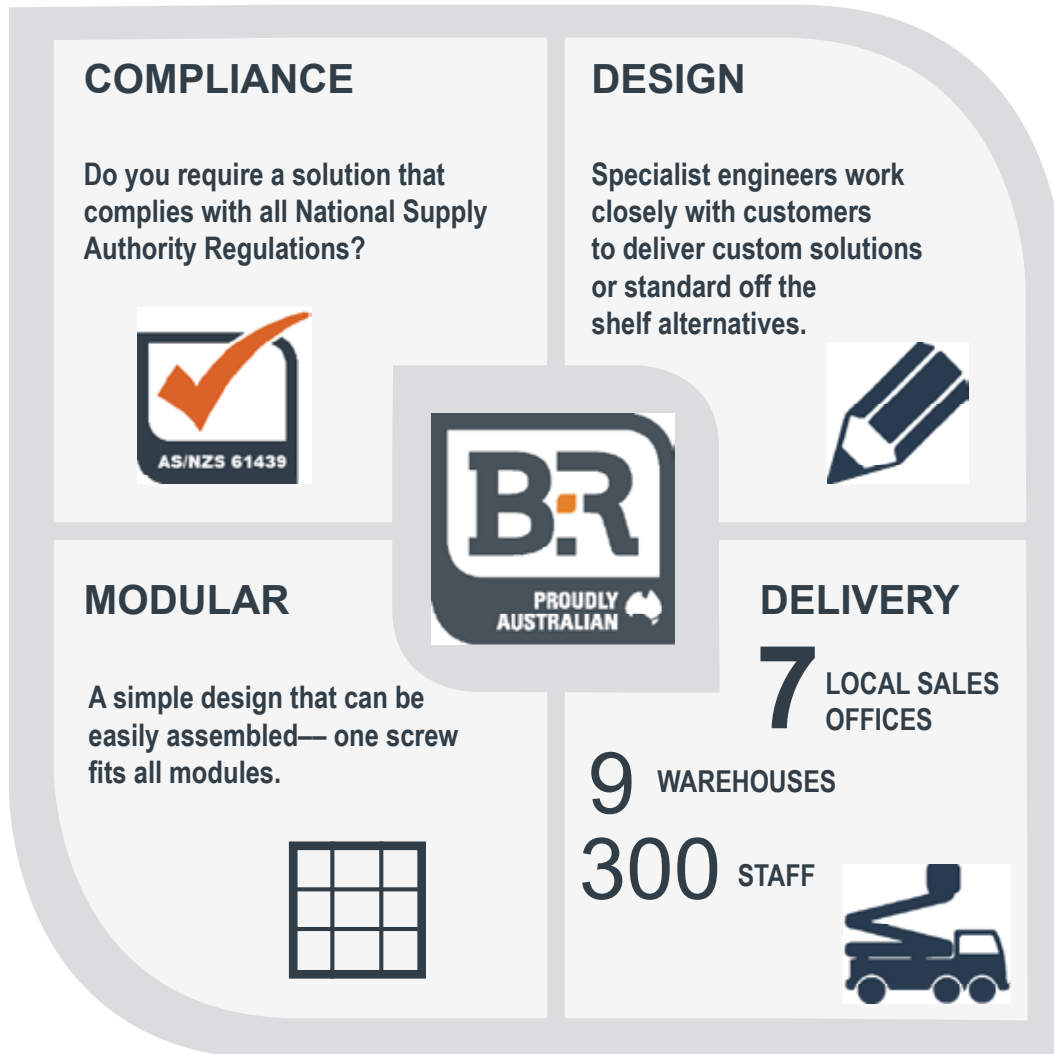

Modular & pre-configured switchboards

**B&R's Infinity 3G range is a smart, national approach to metering providing a modular or pre-configured solution for power distribution and metering applications up to 630Amps.**

## FEATURES

- Complies with all Australian Switchboard Standards.
- Meets and exceeds all National Authority Regulations for power distribution and metering applications up to 630Amps.
- Simple design to reduce errors and call backs.
- Easily assembled saving time and labour.
- Tested to IEC 61439 and compliant with AS/NZS 61439 — the Australian standard for switchboards.
- Enclosures to suit all environmental conditions and are available in IP66, IP34 and IP2x.
- Metric Matrix modular grid system makes switchboard design quick and compact.
- One fixing screw fits all modules reducing assembly time.
- Hinged escutcheons improve safety during maintenance.
- Escutcheons and panels are interchangeable and allow for either left or right hinging.
- Special door hinging allows door to be left or right hinged.
- Loose supply, pre-assembled or pre-wired options to suit your time and budget.
- Manufactured from zinc coated steel, 316 stainless steel and aluminium.

# Compliance Testing, Specifications & Test Reports

Even before functionality, safety is a major concern for any switchboard supplier. At B&R, we strive to ensure all our innovative designs bring safety to our customers as a prime focus and regard Standards as an important compliance requirement to ensure safety.

Infinity 3G is arguably the only metering switchboard system which can be shown to meet and exceed the very latest Australian and International Standards.

## Switchboard Manufacturers' Responsibility

During the design and assembly of any switchboard there will be many technical decisions that need to be made to ensure design safety and switchboard reliability. Each and every application will have its unique parameters that have to be taken into account.

This specification sheet attempts to set the limits of Infinity 3G's modular approach to these designs and therefore should be considered to be the limits of application.

At all times designers, assemblers, installers and contractors must comply with the Australian Wiring Rules (AS/NZS 3000).

The Wiring Rules in-turn will call up auxiliary standards such as AS/NZS 61439.

AS/NZS 61439 Low-voltage switchgear and controlgear assemblies provides a comprehensive compliance requirement to which Infinity 3G has been designed. This product has been type tested by NATA approved testing Authorities. The table below shows these requirements and compliance.

Degree of Protection	Enclosure Series			
	Econo IP2X	Centro IP34	Primo IP66	Units
Rated voltage (Un)	690	690	690	V
Rated operational voltage (Ue)	480	480	480	V
Rated insulation voltage (Ui)	690	690	690	V
Rated impulse withstand voltage (Uimp)	6000	6000	6000	V
High voltage withstand	3500	3500	3500	V
Power frequency withstand voltage	2000	2000	2000	V
Rated current of the ASSEMBLY (InA)	630	630	630	A
Rated peak withstand current (Ipk)	50	50	50	kA
Rated short-time withstand current (Icw)	36	36	36	kA
Rated conditional short-circuit current (Icc)	36	36	36	kA
Rated frequency (fn)	50	50	50	Hz
Pollution degree	3	3	3	
Type of earthing system	MEN	MEN	MEN	
Mechanical impact protection	IK10	IK10	IK10	
Clearance	>14	>14	>14	mm
Creepage	>14	>14	>14	mm
Protective circuit	<25	<25	<25	mΩ

Individual modules and switchgear may have ratings less than the above and due consideration needs to be made when compiling a specification using these modules and switchgear.

## Tests in accordance with IEC 61439-1 and 2 Ed 2.0 2011 and AS/NZS3439.1

No.	Characteristics to be verified	Clause	Status / by	Compliance
1	Strength of material and parts	10.2		
1a	Resistance to corrosion	10.2.2	Compliant	The resistance to corrosion was tested using a representative sample. Plus ES report 103687
1b	Thermal stability	10.2.3.1	N/A	This clause refers to mainly plastic enclosures
1c	Resistance to abnormal heat & fire due to internal electric effects.	10.2.3.2	Compliant	All insulating materials supplied have been tested to 960° glow-wire standard. Plus ES report 103863
1d	Resistance to ultra-violet (UV) radiation	10.2.4	Compliant	UV ratings refer to plastic enclosures however metal powdercoated enclosures incorporates UV stabilisation. AksoNobel report 20LSR178
1e	Lifting	10.2.5	N/A	Lifting is verified by test, if required. Generally only related to larger switchboards to which lifting mean (lugs) have been provided. Plus ES report 103687
1f	Mechanical impact	10.2.6	Compliant	IK10. Metal enclosure systems have been tested to exceed IK 10 (20 Joules).
1g	Marking	10.2.7	Assembler	Markings must be verified by test. Tests are performed by rubbing with water and petroleum spirits: generally done by the Switchboard Builder (Assembler).
2	Degree of Protection	10.3	Compliant	IP66; Ingress Protection (IP) rating needs to be verified by test or by assessment. SIMTARS report NE16/0025
3	Clearances	10.4	Compliant and Assembler	Clearance and creepage can only be verified by test. Switchboard Builders (Assembler) must maintain compliance by ensuring correct clearance and creepage distances are maintained at >8mm (Uimp=8kV) and >16mm (Ui=1kv) respectively. AUSGRID report 103484
4	Creepage distances	10.4		
5	Protection against electric shock and integrity of protective circuits:	10.5		
5a	Effective continuity between the exposed conductive parts of the ASSEMBLY and the protective circuit.	10.5.2	Compliant and Assembler	Equipotential protective earth bonding points are required to be verified by test to less than 0.1ohm. Infinity 3G enclosure designs have been tested by AUSGRID. Report 103484
5b	Short-circuit withstand strength of the protective circuit	10.5.3		Infinity 3G enclosures are provided as a basic empty enclosure and as such protective circuit verification has not been tested as internal configurations are not known. Verification may be by test. AUSGRID report 103484
6	Incorporation of switching devices and components		Assembler	Points 6, 7 and 8 are largely the responsibility of the Switchboard Builder (Assembler). It is a requirement that the Assembler follow and adhere to guidance from the original manufacturers, such as B&R and the switchgear manufacturer. Switchboard Builders need to be aware of the Standard's requirements for these verification points and incorporate these into complete design verification documentation.
7	Internal electrical circuits and connections			
8	Terminals for external conductors			
9	Dielectric properties:	10.9		
9a	Power-frequency withstand voltage	10.9.2	Compliant	Infinity 3G enclosures are provided as a basic empty enclosure and as such protective circuit verification has not been tested as internal configurations are not known. Verification may be by test. AUSGRID report 103484
9b	Impulse withstand voltage	10.9.3		
10	Temperature-rise limits	10.1	Designer or Assembler	Temperature-rise can be determined by test or by comparison or by calculation. Temperature-rise methods provided in AS/NZS 60890 can be used for switchboards not exceeding 1600A rating. The Infinity 3G range does not exceed 1600A and therefore AS/NZS should be used by the Designer.
11	Short-circuit withstand strength	10.11	Compliant	Enclosures with a fault rating greater than 10kA need to be compliant with AS/NZS 61439. Verification can be done by test or comparison with a reference design. The Infinity 3G range have been tested. AUSGRID report 103484
12	Electromagnetic compatibility (EMC)	10.12	Assembler	Equipment installed in switchboards shall comply with the immunity requirements of the relevant product or generic EMC standard. The Switchboard Builder (Assembler) shall obtain from the device and or component manufacturer the specific performance criteria of the equipment based on the acceptance criteria given in the relevant standard.
13	Mechanical operation	10.13	Assembler	This verification testing need NOT be done on devices that have already been type tested according to their relevant product standard. Only if their mechanical operation has been modified does the assembly need to be re-tested by cycling in 200 times.

# Supply Options

Providing a customisable, modular switchboard system, the Infinity 3G range is the ultimate in versatility. Complying with all State Supply Authority Rules and Regulations, Infinity 3G is suitable for multiple tenancy, domestic and commercial installations up to 630A.

1

## Option 1: Pre-Configured + Pre-Wired

- Metalware fully assembled
- Schneider or Terasaki switchgear options
- All wiring included
- Modular design allows optimal placement
- 100% fit-for-purpose, ready for installation
- Engineering solutions can be provided
- Supplied fully AS/NZS 61439 compliant

2

## Option 2: Pre-Configured

- Metalware fully assembled
- Save on assembly time
- General arrangement drawing supplied
- Switchboard builder needs to verify design

3

## Option 3: Loose Supply

*(modular to customer specifications)*

- Supplied loose
- Contractor build
- General arrangement drawing supplied

## Pre-Configured Infinity 3G

At B&R, we have created a range of pre-configured modular switchboard solutions to suit supply authority rules and regulations.

B&R's Infinity 3G pre-configured range provides customers with the ability to order a standard design that is available with short lead times. This means that our customers are provided with smarter, more efficient designs that comply with the various state Authority Rules and Regulations.

These standard, pre-configured designs are available as metalware only or assembled and pre-wired, both off-the-shelf.

Our in-house electrical integration team install all switchgear and wiring of the pre-wired products, making the switchboard 100% fit-for-purpose, ready for installation on site.

Pre-configured and/or pre-wired solutions are available in the following states:

- Queensland
- New South Wales
- Victoria
- South Australia

Pre-configured Infinity 3G solutions are suitable for installation in Multi-Tenancy residential applications as they provide multiple metering positions. Each state solution has been designed with a standard configuration.

For more information contact your local B&R sales representative to discuss your requirements.

# Pre-Configured Infinity 3G

Queensland

QLD

- Robust construction to ensure long service life.
- Region C wind rated to AS1170.2-2002: Structural design actions – Wind actions.
- Trouble free direct baying of enclosures to accommodate additional configurations.
- Manufactured from 1.6mm zinc coated steel
- Powdercoated Light Grey RAL7035.

Comes standard with:

- Large 3mm aluminium gland plate
- Stainless steel door hinges
- 3-point locking
- Recessed padlockable swing handle and a standard switchboard 92268 keyed cylinder
- Document holder
- Roof sunshade provided on CT switchboards
- Multiple Earth Neutral (MEN) provided
- Includes AS/NZ 61439 compliance documentation

## ORDERING GUIDE

Metalware Assembled

No functional devices, wiring or labels included.

# Pre-Configured Infinity 3G

Victoria

VIC

- Robust construction to ensure long service life.
- Region C wind rated to AS1170.2-2002: Structural design actions – Wind actions.
- Trouble free direct baying of enclosures to accommodate additional configurations.
- Manufactured from 1.6mm zinc coated steel.
- Powdercoated Light Grey RAL7035.

Comes standard with:

- Large 3mm aluminium gland plate
- Stainless steel door hinges
- 3-point locking
- Recessed padlockable swing handle and a standard Victorian CL001 keyed cylinder
- Document holder
- Roof sunshade
- Multiple Earth Neutral (MEN) link provided
- Includes AS/NZS 61439 compliance documentation.

▲ Available on request

\*Aluminium enclosures have an external dimension 5mm larger than stated above however internal module sizes are the same.

**All enclosures come standard with a swing handle lock with options for padlocking and/or 92268 keyed cylinders or CL001 keyed cylinders.**

The swing handle is also compatible with all authority keyed cylinders which are best obtained from your local locksmith (except NSW, see accessories below)

## LEFT OR RIGHT

Special door hinging allows field reversible doors to be left or right hinged (single door version only, example not shown).

## 3-POINT LOCKING

Three point locking system ensures IP66 door seal whilst also reducing vandalism risk.

## FIP GASKET

No memory, formed in place, no seam gasket technology provides superior sealing system for long-life.

## DOOR STAY

Robust door stay holds door open, improving safety.

## REAR RAIL

Rear rail allows mullion to be fitted at the rear for cable management according to AS/NZS 3000.

## ROBUST CONSTRUCTION

Top and back are made from one piece of material improving environmental performance within external applications.

## BAYABLE

Open side panels ensure simple and easy baying of enclosures to create larger metering enclosure solutions.

## STAINLESS STEEL HINGE

100% high grade 316 stainless steel hinges ensure trouble-free operation and long life.

## DOOR LOCK

- New low profile lever handle locking provides for factory assembled construction and quality.
- Provision for Authority key barrel (45mm)
- Padlockable swing handle door lock with optional 92268 or CL001 cylinder provided

## A4 DOCUMENT HOLDER

Large A4 document holder allows for complete switchboard documentation in compliance with AS/NZS 3000.

## GLAND PLATE

Large 3mm aluminium gland plate supplied as standard.

### GALVANISED PLINTH

- 50mm Ø holes allow pipe to be used for slinging during installation.
- Corrosion proof fully galvanised rigid 3mm sheet steel plinth.
- Plinth comes pre-fitted with pallet for easy transportation and stability
- Single sheet steel construction provides superior rigidity and strength
- Mounting brackets allow securing of plinth beyond the perimeter of the enclosures, however 100mm clearance is needed on all sides for this feature.

## Project Profile

Padstow Gardens, Eight Mile Plains, QLD

Padstow Gardens is a residential development located in Eight Mile Plains, South of Brisbane, consisting of eighteen residential townhouses.

A solution was required to supply an IP rated, modular switchboard solution for a multiple tenancy, central location within the complex. This project consisted of two (2) stages.

D&L Williamson Electrical is a family owned business with over 25 years' experience in the building industry. Based in south east Queensland, D&L provide a range of electrical services, including commercial projects, renovations, security installations and switchboard upgrades.

---

**“We appreciate the high level of after sales service that we receive from B&R sales representatives.”**

---

D&L were contracted to complete electrical works for Padstow Gardens. As part of stage one, D&L required a main switchboard with the capacity to house CT metering and private metering for nine of the eighteen residential townhouses within the complex.

For stage two, a second main switchboard was required for all remaining townhouses located in a different area of the complex.

The main switchboard needed to be installed outdoors, and therefore IP66 rating was specified for total protection against the ingress of dust and water.

B&R provided an Infinity 3G modular switchboard solution for this project. Utilising B&R's wholesale partners, the entire product solution was supplied through CNW Electrical Wholesale and Energy Solutions located in Geebung.

The current ratings at Padstow Gardens were also considered for this project as they were expected not to exceed 125 Amps.

B&R and D&L Williamson Electrical selected the Primo range as it met all the needs of this project including the IP66 protection rating required for installation outdoors.

B&R's Infinity 3G product range is a modular solution for commercial and residential applications up to 630 Amps.

B&R designed, manufactured and assembled the switchboard at their facility at Heathwood, south of Brisbane.

B&R delivered the switchboard over to D&L to wire and complete the installation on site. This kept the lead time of the project to a minimum, and ensured that D&L could offer their customer a time effective solution.

D&L and B&R have worked closely together in the past on projects including Aspect on Archer in Toowong, and Southpoint, a new apartment development in Moorooka.

Michael from D&L Williamson appreciates the quality of after-sale service they receive from B&R sales representatives. With external time constraints to be met, D&L value the quick turn around with any changes or additions needed.

“With power coming on soon, we can't have someone taking weeks to get something done – it needs to be sorted promptly”. D&L are comfortable that any questions they have will be addressed quickly and thoroughly. B&R and D&L look forward to working together in the future, including on a new development at Albany Creek with similar requirements to Padstow Gardens.

# Centro Range

- Robust construction to ensure long service life.
- Region C wind rated to AS1170.2-2002: Structural design actions – Wind actions.
- Full width enclosure with no centre mullion.
- Special door hinging allows field reversible doors to be left or right hinged.
- Manufactured from 1.2mm zinc coated steel.
- Powdercoated Light Grey RAL7035.

Comes standard with:

- 3mm aluminium gland plate
- Stainless steel door hinges
- 3-point locking
- Padlockable swing handle door lock with optional 92268 or CL001 cylinder provided
- Document holder
- Top and bottom mullion rail

## NO MULLION DOUBLE DOOR

Features an innovative design to achieve IP34 without the use of central mullion. This allows for complete access without obstruction.

## ROBUST CONSTRUCTION

Top and back are made from one piece of material improving environmental performance within external applications.

## LEFT OR RIGHT

Special door hinging allows field reversible doors to be left or right hinged (single door version only, example not shown).

## 3-POINT LOCKING

Three point locking system ensures IP34 door seal whilst also reducing vandalism risk.

## AESTHETIC DESIGN

Bevel edged doors, neutral colour and plinth cover with no visible mounting holes provides a professional enclosure system.

## STAINLESS STEEL HINGE

100% high grade 316 stainless steel hinges ensure trouble-free operation and long life.

## DOOR LOCK

- New low profile lever handle locking provides for factory assembled construction and quality.
- Provision for Authority key barrel (45mm)
- Padlockable swinghandle door lock with optional 92268 or CL001 cylinder provided

## A4 DOCUMENT HOLDER

Large A4 document holder allows for complete switchboard documentation in compliance with AS/NZS 3000.

### RAISED ACCESS PLINTHS

- High performance galvanised steel ensures corrosion-free operation.
- Vandal resistant front cover with no visible mounting points.
- Raising plinths only used for 1270mm high enclosures.
- Powdercoated RAL7035

### GALVANISED PLINTHS

- 50mm Ø holes allow pipe to be used for slinging during installation.
- Corrosion proof fully galvanised rigid 3mm sheet steel plinth.
- Plinth comes pre-fitted with pallet for easy transportation and stability
- Single sheet steel construction provides superior rigidity and strength
- Mounting brackets allow securing of plinth beyond the perimeter of the enclosures, however 100mm clearance is needed on all sides for this feature.
- Powdercoated black

# Econo Range

- Robust construction to ensure long service life.
- Frame system clips together to the desired configurations.
- Wide selection of top, bottom pair and side pair (set of 2) that can have either closed (blank) or opening (access) features allowing most combinations to meet application demands.
- Manufactured from 1.6mm zinc coated steel.
- Powdercoated Light Grey RAL7035.

## SIMPLE FRAME

Frame system simply clips together to suit the desired configurations.

## SIDE BLANK

## BOTTOM ACCESS

## EARTH STUD

M10 stud provides ample earthing connection points to ensure compliance with Wiring Rules.

## INTERNAL RAILS

The 4D deep frame has internal rails to allow for equipment mounting.

## TOP BLANK

## CORNER SNAP CLIPS

Innovative corner section allows simple clipping together ensuring squareness and rigidity.

## SIDE ACCESS

Allows baying together of frames.

## BACK SYSTEM

- Bracket allows accessible mounting point externally to frame.
- Modular back system provides multiple solutions and includes joiners.

The frame is symmetrical allowing it to be rotated 90° once assembled to achieve other size configurations. For example a 12H x 14W can become 14H x 12W simply by rotating.

## ACCESSORIES

Part Number	Description
TGYFXEK	Fixed escutcheon mounting kit (includes an additional set of brackets and tubenuts)
TGYEPLK▲	Escutcheon padlock brackets to suit all escutcheons (Bag of 5)
TGY250M5	M5 Hex head tapite screws (Bag of 250)
TGY10ESB▲	M5 extended sealing bolt (Bag of 10)

▲ Available on request.

# DIN Rail Modules

- Keyhole attachment points allow for a one person installation and assembly operation.
- Unique design, multi-function escutcheon provides multiple options including:
  - Left and right hinged
  - Sealable
  - Padlockable
  - Fixed (kit required, sold separately)
- Large link bar tunnels to accept up to 25mm<sup>2</sup>.
- Manufactured from
  - 1.6mm galvanised steel (internals)
  - 1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

## KEYHOLES

Keyholes allow easy placement of modules into enclosures without having to have a third hand.

## SAFETY

Bevelled DIN cutout area provides additional rigidity.

## SAFETY

All exposed edges are folded back.

## FIXINGS

Unique fixing tubenut remains captive to escutcheon whilst also ensuring continuous earthing.

## ACCESSORIES

Part Number	Description
TGYFXEK	Fixed escutcheon mounting kit (includes an additional set of brackets and tubenuts)
TGYEPLK▲	Escutcheon padlock brackets to suit all escutcheons (Bag of 5)
TGY250M5	M5 Hex head taptite screws (Bag of 250)
TGY10ESB▲	M5 extended sealing bolt (Bag of 10)
TGLBK	E&N brackets (set of two), for LK uncovered links, links excluded
PF6TR	Pole filler 6-pole tool removable
PF6TR/PK	Pole filler kit 6-pole

▲ Available on request.

All link bars have tunnels to accept large 25mm<sup>2</sup> cables or smaller.

# Segregation Modules & Dividers

- Keyhole attachment points allow for a one person installation and assembly operation.
- Knockouts are laser cut to minimise assembly efforts.
- This module fits behind equipment modules to provide segregation and to increase forms of internal separation.
- Four studs allow the fitting of a mounting pan for equipment (excluding TGYSG0402).
- Additional venting is provided at top and bottom to facilitate heat dissipation.
- Mitred corners allow easier access to cables.
- Use segregation module with a DIN rail module to form an Authority Module.
- Manufactured from
  - 1.6mm zinc coated steel
  - Insulated phenolic resin black panel
- Powdercoated Light Grey RAL7035.

## KEYHOLES

Keyholes allows placement of modules into an enclosure easily.

## KNOCK-OUTS

Knock-outs are laser cut to minimise assembly efforts. Special edge protector provided with slide to maintain IP2x.

## INSULATED PANEL

Insulated panel allows easy drilling and workability for cable entry.

## SEGREGATION

This module fits behind equipment modules to provide segregation.

## FOUR STUDS

Four studs allows the fitting of a mounting pan for equipment (excluding TGYSG0402).

## VENTING

Additional venting is provided at top and bottom to facilitate heat dissipation.

## MITRED CORNERS

Mitred corners allow easier access to cables. Round or slotted knockouts for cable entry.

**Module Divider (size 6 shown)**  
Each divider is supplied with 2 edge protectors that fit into the knock-out areas to protect cables.

**Segregation Module (6x6 shown)**  
All segregation modules fit in and behind all switchgear modules. This allows an increase in the form factor or simply seal-off certain areas of the switchboard while maintaining IP2X and IPXXB. Top and bottom are insulated black panel to allow easier customisation for cabling. Ventilation is also provided to ensure switchboard temperature rise limits are not exceeded. Escutcheons need to be ordered separately if required.

Part Number	Module Height	Depth (mm)*
TGYDV02	2	196
TGYDV03	3	196
TGYDV04	4	196
TGYDV06	6	196

\* Full enclosure depth

Part Number	Module Size		Depth (mm)*
	Height	Width	
TGYSG0402▲	4	2	160
TGYSG0404▲	4	4	160

TGYSG0604▲	6	4	160
TGYSG0606▲	6	6	160
TGYSG0806▲	8	6	160
TGYSG1006▲	10	6	160
TGYSG1206▲	12	6	160

\* Allows 40mm space behind segregation module and back of enclosure.

▲ Available on request.

## ACCESSORIES

Part Number	Description
TGY250M5	M5 Hex head tapite screws (Bag of 250)
TGYEP▲	Clip-on cable entry edge protector (5 sets)

▲ Available on request.

# Switchgear Modules

- Keyhole attachment points allow for a one person installation and assembly operation.
- Dual or single MCCB fitting with laser cut escutcheon knockouts allows multiple position of switchgear.
- Open frame structure allows for easy wiring.  
Manufactured from
  - 1.6mm galvanised steel (internals)
  - 1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

TGMS0604/T

## FLEXIBILITY

Adjustable mounting pan depth for different gear mounting.

## KEYHOLES

Keyholes allow easy placement of modules into enclosures without having to have three hands.

## MULTI-FUNCTION ESCUTCHEON

Unique design provides multiple options including:

- Left and right hinged
- Sealable
- Padlockable
- Fixed (kit required)

Switchgear devices are NOT included and should be ordered separately from the switchgear manufacturer.

TGCCB630A

# Chassis Modules

- Keyhole attachment points allow for a one person installation and assembly operation.
- Open frame structure allows for easy wiring from MCBs to outgoing circuits.
- All circuits are numbered according to AS/NZS 3000.
- Manufactured from
  - 1.6mm galvanised steel (internals)
  - 1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

Comes standard with:

- Pre-cut escutcheon
- Earth and neutrals on each side
- Neutral bridge to connect left and right neutral

## MULTI-FUNCTION ESCUTCHEON

Unique design provides multiple options including:

- Left and right hinged
- Sealable
- Padlockable (kit required)
- Fixed (kit required)

## NEUTRALS

Positioned both left and right of chassis for easy wiring. Neutrals linked with copper busbar bridge.

## NEUTRAL BRIDGE

Connects left and right side neutral bars.

## INTEGRATED EARTH

Provided for simple wiring requirements.

# CT Modules

- Keyhole attachment points allow for a one person installation and assembly operation.
- CT module is the same size for 400A and 630A CTs.
- Transparent screen covers are provided as an accessory for compliance to regulatory rules and improved safety.
- Potential fuse bracket provided as a standard inclusion.
- 400A version suits all S-Type CT's for either 200A or 400A applications.
- 630A version suits T-Type CT's.
- Alternative CT mounting positions for Queensland regulations.
- Manufactured from
  - 1.6mm galvanised steel (internals)
  - 1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

# Link Modules

- Keyhole attachment points allow for a one person installation and assembly operation.
- Various cable sizes on all types of link modules ensures flexibility.
- Incomer links allow simplicity for incoming termination of cables, reducing errors.
- Provides for multiple cable terminations.
- Manufactured from
  - 1.6mm galvanised steel (internals)
  - 1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

Comes standard with:

- Hinged escutcheon
- Label (MEN links only)

# Panels

- Panels can be pre-drilled to suit authority meter patterns.
- Can be supplied blank for free placement of meters.
- High grade paper phenolic resin black panel (Asbestos Free)
- Waterproof (hydroscopic).
- Exceeds 960°C glow-wire test requirements as per the Australian Standards AS/NZS 61439.
- Fitted with hinges to allow either left or right hand hinging.
- Requires matching enclosure side male hinge kits to suit application requirements.
- Can be made as a fixed panel (not hinged) using fixed panel mounting kit (TGPFXPK).
